GitHub Jet Heatmap Animation Setup Guide

This guide explains how to generate and add a GitHub Jet Heatmap animation to your GitHub profile README.

Step 1: Clone the Repository

```
git clone <repository-url>
cd <repository-folder>
```

Step 2: Install Dependencies

```
npm install
```

This installs all required Node.js packages.

Step 3: Create a GitHub Personal Access Token (PAT)

1. Open **GitHub** → **Settings** → **Developer settings** → **Personal access tokens**.
2. Create a new token.
3. Grant only the required permissions:
 - ☒ **read:user**
 - ☒ **public_repo** (for public repositories)
 - ☒ **repo** (only if the repository is private)
4. Copy the generated token.

Note: Do not grant unnecessary permissions such as `delete_repo`, `workflow`, or `admin:org`.

Step 4: Generate the SVG Animation

macOS / Linux (zsh)

```
export GH_USERNAME="YOUR_GITHUB_USERNAME"
export GH_TOKEN="YOUR_GITHUB_TOKEN"
```

```
node generate.mjs
```

or

```
GH_USERNAME="YOUR_GITHUB_USERNAME" GH_TOKEN="YOUR_GITHUB_TOKEN"
node generate.mjs
```

Windows PowerShell

```
$env:GH_USERNAME="YOUR_GITHUB_USERNAME"
$env:GH_TOKEN="YOUR_GITHUB_TOKEN"
```

```
node generate.mjs
```

Step 5: Verify Generated Files

After the script completes successfully, the following files will be created:

```
dark.svg
light.svg
```

or

```
dist/
├── dark.svg
└── light.svg
```

Step 6: Commit and Push

```
git add .  
git commit -m "Add GitHub Jet Heatmap animation"  
git push
```

Step 7: Add Animation to Your GitHub README

If both dark and light themes are generated:

```
<p align="center">  
  <picture>  
    <source media="(prefers-color-scheme: dark)"  
srcset="https://raw.githubusercontent.com/YOUR_USERNAME/YOUR_USERNAME/main/dark.  
svg">  
    <source media="(prefers-color-scheme: light)"  
srcset="https://raw.githubusercontent.com/YOUR_USERNAME/YOUR_USERNAME/main/light.  
svg">  
      
  </picture>  
</p>
```

Replace **YOUR_USERNAME** with your GitHub username.

Result

Once committed and pushed, the animated GitHub Jet Heatmap will automatically appear on your GitHub profile README and adapt to the visitor's light or dark theme.
